

BOLLE

The world's only twice-fermented non-alcoholic wine

Most non-alcoholic wine simply removes the alcohol — and with it the aroma, structure and mouthfeel that make wine taste like wine. BOLLE goes further. After dealcoholization, a second, patent-pending fermentation rebuilds what conventional methods strip away. No other producer in the world re-ferments dealcoholized wine. Founded by chemist and oenologist Roberto Vanin in 2021. Zepeim is your US wholesale distributor.
